<sup>1</sup> If "Additional" Standards are used or offered in a Solution, the certification of these Standards is required.

<sup>2</sup> Business Application Provider has to perform an interoperability check.

<sup>3</sup> If no EDC is implemented in the solution, at least the Data Management-API is subject of the certification.

<sup>4</sup> Can only be provided in combination with certified Core Services.

<sup>5</sup> Digital Twins have to contain the defined Specific Asset Ids. Additional use case specific data models have to be provided as Digital Twin submodels. If the respective data models are used, these have to be certified against the specification defined within the Industry Core standard.

<sup>6</sup> When using certain features, the referenced section of the standard is required.

<sup>7</sup> When using certain features, the focussed section of the standard is optional.

<sup>8</sup> TISAX Level 2 is mandatory from July 2025, with grace period of 12 month, for all OSP, ESP and BAP and TISAX Level 3 is mandatory for CSP-A/B (as soon as the standard is adapted).

<sup>R</sup> Required.

		<b>Backend Integration Pattern 2</b> CX-0055, CX-0084		<b>BPDM:</b> CX-0010 CX-0011 CX-0012		
		<b>Simple Data Exchanger</b> CX-0007				
		<b>Data Chain</b> CX-0005, CX-0045				
		<b>Provider Base: CX-0008<sup>3</sup></b>				

<sup>1</sup> If "Additional" Standards are used or offered in a Solution, the certification of these Standards is required.

<sup>2</sup> Limitations Jupiter: this role currently only covers part of the registration process in the Catena-X data space. The currently available process is depicted in figure "General Onboarding Process".

<sup>3</sup> TISAX Level 2 is mandatory from July 2025, with grace period of 12 month, for all OSP, ESP and BAP. TISAX Level 3 is mandatory for CSP-A/B (as soon as the standard is adapted).

<sup>4</sup> Catena-X Sandboxes contain all services required for the operation of a minimum valuable Catena-X data space, namely: CSP-B services (excluding the cleansing service of BPDM and GXDCH integration) and OSP services.

<sup>5</sup> Core Services B lists Core Services that can only be operated once in the Catena-X data space due to business reasons or technical limitations and are therefore tendered via the nomination process of the Association.

# Detail View (3/3) | Remaining Roles

Modular System Catena-X Certification							
Value Added Services <sup>1</sup>
