Semantic	**Digital Twin** CX-0002 or **Agents** CX-0084
Provider Base	CX-0008[8]

[1] If "Additional" Standards are used or offered in a Solution, the certification of these Standards is required.
[2] Business Application Provider has to perform an interoperability check.
[3] If no EDC is implemented in the solution, at least the Data Management-API is subject of the certification.
[4] Can only be provided in combination with certified Core Services.
[5] Digital Twins have to contain the defined Specific Asset Ids. Additional use case specific data models have to be provided as Digital Twin submodels. If the respective data models are used, these have to be certified against the specification defined within the Industry Core standard.
[6] When using certain features, the referenced section of the standard is required.
[7] When using certain features, the focussed section of the standard is optional.
[8] TISAX Level 2 is mandatory from July 2025, with grace period of 12 month, for all OSP, ESP and BAP and TISAX Level 3 is mandatory for CSP-A/B (as soon as the standard is adapted).

Modular System Catena-X Certification

Use Case	Data Provider & Consumer	Enablement Service Provider		Core Service Provider[5]	Onboarding Service Provider[2]	Sandbox Service Provider
	Connector	**Connector as a Service**	**Digital Twin Registry as a Service**	**Core Services**	**Onboarding Services**	**Sandbox Services[4]**
Role / Capability	When using a CX-Certified enablement service, no separate certification is required	**Connector** CX-0018	**Digital Twin Registry** CX-0002	**Identity Wallet:** CX-0013 CX-0049 CX-0050 CX-0149	CX-0006 CX-0009	**Connector:** CX-0018 **Onboarding:** CX-0006 CX-0009
Base Standard	CX-0018			**Onboarding:** CX-0006 CX-0009 **Portal:** CX-0001 CX-0014 CX-0015 CX-0053		**BPDM:** CX-0010 CX-0012 CX-0074
Additional[1]	CX-0002 CX-0003 CX-0005 CX-0007 CX-0045 CX-0055 CX-0084 CX-0126 CX-0127	**Backend Integration Pattern 1** CX-0002, CX-0003, CX-0055 **Backend Integration Pattern 2** CX-0055, CX-0084 **Simple Data Exchanger** CX-0007 **Data Chain** CX-0005, CX-0045		**Marketplace:** CX-0054 **BPDM:** CX-0010 CX-0012 CX-0074 CX-0076		**Identity Wallet:** CX-0013 CX-0049 CX-0050 CX-0149 **Portal:** CX-0001 CX-0014 CX-0015 CX-0053 **Marketplace:** CX-0054 **Golden Record (optional):** CX-0076

Provider Base: CX-0008[3]

[1] If "Additional" Standards are used or offered in a Solution, the certification of these Standards is required.
[2] Limitations Jupiter: this role currently only covers part of the registration process in the Catena-X data space. The currently available process is depicted in figure "General Onboarding Process".
[3] TISAX Level 2 is mandatory from July 2025, with grace period of 12 month, for all OSP, ESP and BAP. TISAX Level 3 is mandatory for CSP-A/B (as soon as the standard is adapted).
[4] Catena-X Sandboxes contain all services required for the operation of a minimum valuable Catena-X data space, namely: CSP-B services (excluding the cleansing service of BPDM and GXDCH integration) and OSP services.
[5] Core Services B lists Core Services that can only be operated once in the Catena-X data space due to business reasons or technical limitations and are therefore tendered via the nomination process of the Association.

Detail View (3/3) | Remaining Roles

Modular System Catena-X Certification							
Value Added Services[1]							
Value Added Service	Data Quality Dashboard	Bank Data Verification	Natural Person Screening	BPDM Fraud Prevention	Country Risk	Sanction Watchlist Dashboard	Company Certificate Management
Standard	CX-0076 CX-0077	CX-0078	CX-0079	CX-0080	CX-0081	CX-0116	CX-0135
Provider Base	CX-0008[2]						

[1] Can only be provided in combination with certified Core Services.
[2] TISAX Level 2 is mandatory from July 2025, with grace period of 12 month, for all OSP, ESP and BAP. TISAX Level 3 is mandatory for CSP-A/B (as soon as the standard is adapted).

Modular System – Business Applikation Provider

Quality[1]	As OEM data provider: CX-0123	As Supplier data provider: CX-0123
Connector[2]	CX-0018	
Semantic	**Digital Twin:** CX-0002 or **Agents:** CX-0084	
Provider Base	CX-0008[3]	

[1] Business Application Provider has to perform an interoperability check.
[2] If no EDC is implemented in the solution, at least the Data Management-API is subject of the certification.
[3] TISAX Level 2 is mandatory from July 2025, with grace period of 12 month, for all OSP, ESP and BAP and TISAX Level 3 is mandatory for CSP-A/B (as soon as the standard is adapted).

Modular System - Business Applikation Provider

Traceability[1]	CX-0125 **Additional[2]:** CX-0005
Industry Core[5,6]	CX-0127: *It is tightly bound to the Industry Core, as Quality Alerts and Quality Investigation Requests should reference batches and/or serialized part instances as described in the standard CX - 0127 INDUSTRY CORE: PART INSTANCE.* *Regarding CX-0005: This standardization is built upon existing standards, such as CX-0127.*
Connector[3]	CX-0018
Semantic	**Digital Twin:** CX-0002 or **Agents:** CX-0084
Provider Base	CX-0008[4]

[1] Business Application Provider has to perform an interoperability check.

[2] If "Additional" Standards are used or offered in a Solution, the certification of these Standards is required.

[3] If no EDC is implemented in the solution, at least the Data Management-API is subject of the certification.

[4] TISAX Level 2 is mandatory from July 2025, with grace period of 12 month, for all OSP, ESP and BAP and TISAX Level 3 is mandatory for CSP-A/B (as soon as the standard is adapted).

[5] Digital Twins have to contain the defined Specific Asset Ids. Additional use case specific data models have to be provided as Digital Twin submodels. If the respective data models are used, these have to be certified against the specification defined within the Industry Core standard.

[6] When using certain features, the referenced section of the standard is required.

Modular System – Business Applikation Provider

Behavioral Twin[1]	Behavioral Twin Endurance Predictor: CX-0059	Behavioral Twin Endurance Estimator: CX-0138	Health Indicator: CX-0141
Industry Core[4, 5]			
Connector[2]	CX-0018		
Semantic	**Digital Twin:** CX-0002 or **Agents:** CX-0084		
Provider Base	CX-0008[3]		

[1] Business Application Provider has to perform an interoperability check.
[2] If no EDC is implemented in the solution, at least the Data Management-API is subject of the certification.
[3] TISAX Level 2 is mandatory from July 2025, with grace period of 12 month, for all OSP, ESP and BAP and TISAX Level 3 is mandatory for CSP-A/B (as soon as the standard is adapted).
[4] Digital Twins have to contain the defined Specific Asset Ids. Additional use case specific data models have to be provided as Digital Twin submodels. If the respective data models are used, these have to be certified against the specification defined within the Industry Core standard.
[5] When using certain features, the referenced section of the standard is required.

Modular System – Business Applikation Provider

PCF[1]	CX-0136
Connector²	CX-0018
Semantic	**Digital Twin:** CX-0002 or **Agents:** CX-0084
Provider Base	CX-0008³

[1] Business Application Provider has to perform an interoperability check.
² If no EDC is implemented in the solution, at least the Data Management-API is subject of the certification.
³ TISAX Level 2 is mandatory from July 2025, with grace period of 12 month, for all OSP, ESP and BAP and TISAX Level 3 is mandatory for CSP-A/B (as soon as the standard is adapted).

Modular System - Business Applikation Provider

Core Service Provider, Onboarding Service Provider, Sandbox Service Provider and Third Party Information Provider

Modular System – Core Service Provider

Core Service Provider[2]	Identity Wallet: CX-0013 CX-0049 CX-0050 **CX-0149** **Portal:** CX-0001 CX-0006 CX-0009 CX-0014 CX-0015 CX-0053 **Marketplace:** CX-0054 **BPDM:** CX-0010 CX-0012 CX-0074 CX-0076
Provider Base	CX-0008[1]

[1] TISAX Level 2 is mandatory from July 2025, with grace period of 12 month, for all OSP, ESP and BAP. TISAX Level 3 is mandatory for CSP-A/B (as soon as the standard is adapted).
[2] Core Services B lists Core Services that can only be operated once in the Catena-X data space due to business reasons or technical limitations and are therefore tendered via the nomination process of the Association.

Modular System – Onboarding Service Provider

Onboarding Service Provider[1]	CX-0006 CX-0009
Provider Base	CX-0008[2]

[1] Limitations Jupiter: this role currently only covers part of the registration process in the Catena-X data space. The currently available process is depicted in figure "General Onboarding Process".
[2] TISAX Level 2 is mandatory from July 2025, with grace period of 12 month, for all OSP, ESP and BAP. TISAX Level 3 is mandatory for CSP-A/B (as soon as the standard is adapted).

Modular System – Sandbox Service Provider

Sandbox Services[1]	**Connector:** CX-0018 **Onboarding:** CX-0006 CX-0009 **BPDM:** CX-0010 CX-0012 CX-0074 **Identity Wallet:** CX-0013 CX-0049 CX-0050 CX-0149 **Portal:** CX-0001 CX-0006 CX-0009 CX-0014 CX-0015 CX-0053 CX-0074 **Marketplace:** CX-0054 **Golden Record (optional):** CX-0076
Provider Base	CX-0008[3]

[1] Catena-X Sandboxes contain all services required for the operation of a minimum valuable Catena-X data space, namely: CSP-B services (excluding the cleansing service of BPDM and GXDCH integration) and OSP services.
[2] TISAX Level 2 is mandatory from July 2025, with grace period of 12 month, for all OSP, ESP and BAP. TISAX Level 3 is mandatory for CSP-A/B (as soon as the standard is adapted).

Value Added Services

Modular System – Value Added Services

Value Added Services[1]	Data Quality Dashboard: CX-0076 CX-0077	Bank Data Verification: CX-0078	Natural Person Screening: CX-0079	BPDM Fraud Prevention CX-0080	Country Risk: CX-0081	Sanction Watchlist Dashboard: CX-0116	Company Certificate Management: CX-0135
Provider Base	CX-0008[2]						

[1] Can only be provided in combination with certified Core Services.
[2] TISAX Level 2 is mandatory from July 2025, with grace period of 12 month, for all OSP, ESP and BAP. TISAX Level 3 is mandatory for CSP-A/B (as soon as the standard is adapted).

Changelog

Changelog

- Added for new features.
  - Added Logistics as a new Use Case
  - Added Standards to the Use Case Core Services
  - Added optional Standard to the Use Case Sandbox Services
  - Added PCF-Rulecook to the Use Case PCF

- Changed for changes in existing functionality.

- Deprecated for soon-to-be removed features.

- Removed for now removed features.
  - Removed footnote from Industry Core in the Use Cases PCF, DCM and PURIS

- Fixed for any bug fixes.

- Security in case of vulnerabilities.
